Career Objective

Hardworking and tech-driven professional with proven problem-solving skills, securing top ranks in multiple team-based hackathons and competitions. Experienced in developing both code-based and low-code applications, with a passion for leveraging technology to make life better and easier through innovative solutions.

Education

SJB Institute of Technology

BE in Computer Science and Engineering - 8.5 CGPA

2021 - 2025

Bengaluru, Karnataka

Tungal Science Composite PU College

Pre-University Course - 90.66%

2019 - 2021

Jamkhandi, Karnataka

Experience

Cognizant Technology Solutions.

Jul. 2025 - Present.

Programmer Analyst Trainee - Full Time

Bangalore

- Assigned to Oracle APEX development team within the **EPS Oracle DB Technologies** department. Currently working on a key business application using **Oracle APEX** for the user interface and **PL/SQL** for all backend logic. I'm focused on building dynamic, data-driven reports, directly enhancing operational efficiency and improving data accessibility for the team.

Cognizant Technology Solutions.

Mar. 2025 - Jun. 2025

Programmer Analyst Trainee - Internship

Chennai

- Received training in **Frontend development**, **REST APIs**, **Unix**, **Python**, **Oracle Integration Cloud (OIC)**, and **Oracle Cloud Infrastructure (OCI)**
- Developed a **Vehicle Booking System** using **Oracle APEX** low-code framework and **PL/SQL** for backend processing.
- Designed and managed database structures** within **Oracle APEX** to support booking workflows, including **automated email delivery** for booking confirmations.

Code Inbound LLP.

Sep. 2024 - Mar. 2025

SDE Intern - Remote Internship

Delhi

- Worked on enhancing the **Network Monitoring System (NMS)** for network **performance**, **availability**, and **security monitoring**.
- Fixed** SNMP form field visibility issues and **implemented** dynamic field activation based on SNMP version.
- Improved** the **SNMP Interface Table UI** to align with **Figma** design specifications.
- Integrated** Export Node Assets API, enabling users to download **asset data** with a predefined template.

Projects

Sign Language to Text/Speech Translation | *Python, LSTM*

Oct. 2024 - Jan. 2025.

- Developed an **LSTM-based deep learning model** for Word level Indian Sign Language Recognition using the **INCLUDE dataset**, achieving **83.15% training accuracy** and **76.41% test accuracy**, with an **F1-score of 0.80**.
- Processed **120 videos per class** across **20 classes**, including **augmented videos**, to enhance model robustness and improve generalization.
- Built an **evaluation interface** that records a **5-second video**, extracts **45 frames**, and processes them through the trained model for real-time sign language interpretation, with **speech output using Python's pyttsx3 library**.

Plant Disease Detection and Classification using Deep Learning | *Python, CNN*

May. 2024 - Aug. 2024.

- Developed a deep learning model for plant disease detection and classification using **CNN with TensorFlow and Keras**, trained on the **PlantVillage dataset** consisting of **38 classes** and **54,000 images**.
- Achieved **approximately 97% accuracy** in **classifying healthy and infected plants**, demonstrating the model's effectiveness in agricultural diagnostics.

BlogIt | *Next.js, MongoDB, NextAuth.js*

Oct. 2023.

- Developed a **user-friendly blogging platform** with complete **CRUD capabilities**, making it easy for users to **manage blog posts effectively**.
- Utilized **Next.js** for a seamless and **responsive front-end experience**, **MongoDB** for a **scalable and efficient database**, and **NextAuth.js** for **secure authentication and authorization**, ensuring user data protection and access control.

Keeper | *React.js*

Jun. 2023.

- Implemented a **note-taking app** with a **user-friendly input card** that allows users to add notes by entering a title and content. **Each note is displayed as a card**, with a **built-in delete functionality** to remove notes.
- Developed the project to practice **React component implementation** and **state management**, utilizing **React hooks** to manage the **input**, **display**, and **deletion of notes dynamically**.

Technical Skills

C++, Python, HTML5/CSS3, JavaScript, React.js, MongoDB, Express.js, Node.js, Next.js, SQL, PL/SQL, Oracle APEX, Git, GitHub, Visual Studio Code, Replit, GitHub Codespaces

Achievements

- Published an **IEEE research paper** on final-year project, **Video-Based Word-Level Indian Sign Language Translation to Text and Speech Using CNN-LSTM**, presented at **ETCC 2025**, PES University, Bangalore.
- Achieved **Runner-up** in "Code Fiesta" Coding Competition, **SJBIT**, among top participants. **Dec. 2023**
- Secured **Runner-up** in "NoCode" ML Model Training Competition, **IEEE Computer Science Society, BMSCE**, for training a real-time Sign Language Recognition model. **Dec. 2023**
- Awarded **First Place** in "WEBWIZ QUIZ-23", **IEEE Student Chapter, SJBIT**, out of all participants. **Jul. 2023**
- Secured **Runner-up** in "BUILD THE WEB" Web Coding Competition, **RVITM**, Bengaluru, for developing a tourism-related website within 2 hours. **Dec. 2022**
